

Model Ser.11 (EB)

BI-DIRECTIONAL KNIFE GATE VALVE

The Series 11 (EB) model knife gate is a bi-directional wafer type valve designed for general industrial service applications. The design of the body and seat assures non-clogging shut off on suspended solids in industries such as:

- Wastewater treatment plants
- Sludge Handling and storm tanks
- Biogas plants
- Chemical plants
- Food and Beverage
- Agriculture
- etc.

Sizes (DN)

2in/50mm to 48in/1200mm
Larger diameters on request

Working pressure and temperatures

2in/50mm to 5in/125mm: 230 psi/16 bar
4in/150mm to 10in/250mm: 150 psi/10 bar
12in/300mm to 16in/400mm: 90 psi/6 bar
18in/450mm: 75 psi/5 bar
20in/500mm to 24in/600mm: 60 psi/4 bar
28in/700mm to 48in/1200mm: 30 psi/2 bar

GJS 400: 14°F (-10°C) / 176°F (80°C)

Standard flange drilling

EN-1092 PN10
Other flange drillings available on request

Directives

For EU Directives and other Certificates please see the document: Directives & Certificates Compliance - Knife Gate Valves – Catalogues and Datasheets)

Testing

All valves are tested prior to shipping in accordance with the standard EN-12266-1

STANDARD PARTS LIST

Part	Description
1	Body EN-GJS400
2	Gate AISI 304
3	Seat EPDM / NBR
4	Packing PTFE Impreg. Synth. Fibre (ST) + EPDM O-ring
5	Gland follower EN-GJS400
6	Stem Stainless Steel
7	Stem nut Brass
8	Yoke Epoxy-coated Carbon Steel
9	Axial fixing bush AISI 304
10	Friction washer PET + solid lubricant
11	Bushing Bronze
12	Spring pin AISI 420 (ISO 8752)
13	Handwheel DN≤12.20in/310mm: Aluminium (AISI12); DN≥16.70in/410mm EN-GJS400
14	Slider (up to DN300) Nylon

DESIGN FEATURES

Body

Wafer style cast monoblock design, internally machined up to DN 20in/500mm, with reinforced ribs in larger diameters for extra body strength. Special design that includes a new manufacturing process, the machining of the body inside, allowing for more control in the different dimensions tolerances. This machining results in a perfect adjustment of the body with the gate and the seal, reducing the required torque to maintain the tightness and avoiding any build-up of solids that could prevent the valve from closing. The valve design allows an end-offline installation from DN 2in/50mm to DN 20in/500mm. The valve design changes from DN 24in/600mm and above to a two-part bolted body, also internally machined. Full port design in all cases for greater flow capacity and minimal pressure drop. The gate is guided on the whole stroke to ensure bi-directional shutoff. Standard EPDM O-ring on both valve flange connections for sealing

Gate

Stainless steel gate, as standard. Gate is polished on both sides for a greater seal between the gate with both packing and seat. Gate is fully guided in the body allowing for bi-directional service

Seat (resilient)

This is the standard seat. The joint is seated on the body, fitted with a metallic core, in contact with the gate all over its perimeter. This layout provides an adequate watertightness and seamless liquid flow on both ways, avoiding at the same time any build-up of solids that would prevent the valve from closing. The seal is protected by the body itself

Packing

Standard PTFE impregnated synthetic fibre (ST) with EPDM O-ring, with an easy access packing gland ensuring a tight seal. Long-life braided packing is available in a wide range of materials

Non rising stem

The standard stainless steel stem offers a high and long corrosion resistant life

Yoke or actuator support

Made of epoxy coated steel (stainless steel available on request). Compact design makes it extremely robust even under the most severe conditions

Epoxy coating

The epoxy coating on all ORBINOX cast iron and carbon steel valve bodies and components is electrostatically applied making the valves to be corrosion resistant with a high quality finished surface. The ORBINOX standard colour is RAL-5015 blue.

Gate safety protection

ORBINOX automated valves are provided with gate guards in accordance with EU Safety Standards. The design feature prevents any objects from being caught accidentally while the gate is moving. *ONLY IN EUROPE

Actuators

ORBINOX offers a complete range of actuator solutions, including manual, pneumatic, electric and hydraulic actuators

Manual RS Manual NRS Bevel Gear Chainwheel Lever

Pneumatic Double Acting Pneumatic Single Acting Hydraulic Electric RS Electric NRS

OTHER OPTIONS

Other materials of construction

Ductile iron, carbon steel, special stainless steels (CF8M, AISI 316, Duplex, ...), special alloys (254SMO, Hastelloys, ...), etc.

Fabricated valves

ORBINOX designs, produces and delivers special fabricated valves for special process conditions (big sizes and/or high pressures)

Surface treatments

Valve components can be protected or coated for a longer life expectancy, depending on the application of the valves and the valve service conditions. At ORBINOX we can offer alternative treatments and coatings for the different valve components to improve their properties against abrasion (Stellite, hard-chroming, carbides, ...), against corrosion and against adherence

V-Port (Fig. 1)

60 degree and pentagonal port design. Selection depends on the desired fluid control type

Fig.1

Fig.2

Fig.3

Locking device (Fig. 1)

The valve can be designed with a locking pin system to block the gate in emergency situations or for maintenance operations

Mechanical stops

Mechanical stops can be added to limit stem travel at a certain stroke position

Actuator manual override (Fig. 2)

Pneumatic and electric actuators can be equipped with manual override handwheels to manually operate the actuators in emergency situations or for maintenance operations

Stem extensions and floor stand (Fig. 3)

Extensions for valve operation when valves are installed in positions below operation level are available, including wall brackets and different types of pedestals for actuators

Accessories for pneumatic valve automation

Limit and proximity switches, solenoid valves, positioners, flow regulations, air filter units, silencers, junction boxes

SEAT/SEAL TYPES

Material	Max.T (°F)	Max.T (°C)	Applications
EPDM (E)	248	120	Acids and non mineral oils.
NBR (N)	248	120	Resistance to petroleum products.
FKM-FPM (V)	392	200	Chemical service / High temp.

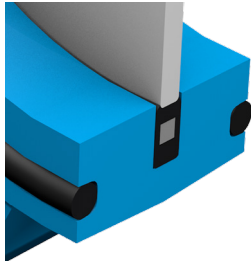

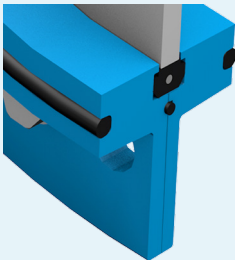

More details and other materials under request

PACKING TYPES

Material	Max.T (°F)	Max.T (°C)	pH
PTFE impregn.synth fibre (ST)	482	250	2-13
Dynapack (DP)	518	270	2-14
Braided PTFE (TH)	500	260	0-14

All types include an elastomere O-ring (same material as seal), excluding TH

SEAT CONFIGURATIONS/DESIGNS

Sizes	Features	
DN 2in/50mm-20in/500mm	Moulded seal with an internal steel core	
DN 24in/600mm	Extruded seal with an internal steel wire	

HANDWHEEL NON-RISING STEM

Standard manual actuator available from 2in/50mm to 24in/600mm and recommended with gearbox from 14in/350mm and above

DN (in/mm)	A (in/mm)	ØB (in/mm)	H (in/mm)	Weight (lbs./kg.)
2/50	1,70/43	8,86/225	12,28/312	18/8

40/1000	4,33/110	25/650	110,86/2816	11,34/288	452/205
48/1200	6,00/150	34/850	130,75/3321	11,34/288	627/284

A: EN558-1 series 20 up to DN 20in/500mm, for DN 24in/600mm and above acc. ORBINOX standard

CHAINWHEEL

Manual actuator recommended for elevated installations. The handwheel is replaced by a chainwheel to accommodate the chain. Available for non-rising stem and for sizes from 2in/50mm to 24in/600mm

DN (in/mm)	A (in/mm)	ØB (in/mm)	H (in/mm)
2/50	1,70/43	8,86/225	13,03/331

6/150	2,20/56	23,30/592	6,00/150	16,33/415	35,03/890

A: EN558-1 series 20 up to DN 20in/500mm, for DN 24in/600mm and above acc. ORBINOX standard

PNEUMATIC CYLINDER

With a double-acting pneumatic cylinder as standard, it is available in sizes from 2in/50mm to 32in/800mm. Single-acting pneumatic cylinders, manual overrides, fail-safe systems as well as a wide variety of pneumatic accessories for valve automation available Actuator sized for 85psi/(6 bar) air supply, see ORBINOX Pneumatic Cylinder Catalogue for more information.

For valves installed in a horizontal position, actuator supports to plant structure is recommended

DN (in/mm)	A (in/mm)	B (in/mm)	H (in/mm)	Connect.	Weight (lbs./kg.)

ELECTRIC ACTUATOR RISING STEM

Designed with a yoke flange for the actuator according to ISO 5210 / DIN 3338 as standard, it is available from 2in/50mm to 48in/1200mm, for rising stem configuration and with manual overrides.

Wide range of electric actuator brands available.

For valves installed in a horizontal position, actuator supports to plant structure is recommended

Maximum pressure torque in clean water at room temperature

ELECTRIC ACTUATOR NON RISING STEM

Designed with a yoke flange for the actuator according to ISO 5210 / DIN 3338 as standard, it is available from 2in/50mm to 48in/1200mm, for non-rising stem configuration and with manual override.

Wide range of electric actuator brands available.

For valves installed in a horizontal position, actuator supports to plant structure is recommended
